

# CASE STUDY - ADVANCE DENTAL STUDIO

## WHEEL EASY

If you have a fleet of vehicles, keeping them rolling is critical to your business operations. Wheel Easy Mobile Automotive Service provides on-site maintenance for your fleet to reduce logistics challenges and minimize the time that your team needs to spend transporting vehicles to the shop. Check out how we've helped Advance Dental Studio save employee hours every month and decrease vehicle down time.

## ADVANCE DENTAL

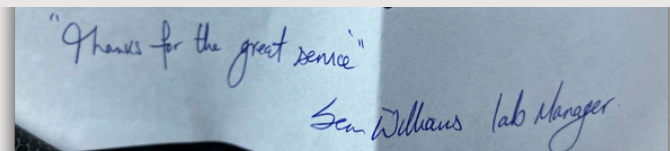

Advance Dental Studio is a dental crown and bridge laboratory specializing in implants, cosmetics, and digital design, including delivery to dental offices throughout London. With two delivery vehicles and a focus on rapid turnaround, they can't be without these vehicles for extended periods.

## SOLUTION

Advance reached out to us for vehicle maintenance in July 2023 - an oil change, tire rotation, and brake inspection on their 2019 Toyota Corolla. We completed these tasks on location, reporting that the front brakes had 20% material remaining, and it would be time to change them soon. In November 2023, we returned to replace them as some grinding noise had started. Since then, we have helped them with front and rear brakes on their 2019 Kia Forte, as well as more oil changes (they get driven a lot!)

## IMPACT

Before working with us, delivery drivers estimated waiting in line at quick lube shops for upwards of two hours for oil changes, and brake repairs would have required two drivers to drop off one vehicle and return to headquarters (and then the return trip to pick up the vehicle), costing an entire day of downtime. With Wheel Easy, the service interruption is reduced to under an hour in one day, with no need for time spent by the drivers.

If your business needs to reduce vehicle downtime, eliminate wasted driver time, and simplify vehicle maintenance logistics, please reach out to Wheel Easy and we would be happy to discuss a service plan with you. Discounts available for larger fleet work.

## TIME SAVED

### OIL CHANGES

- 2 hours / car / month
- 24 hours / year

### BRAKE SERVICE

- 1 hour travel time for two drivers each way, recommended annually
- 4 hours / year

### OTHER MAINTENANCE

- +++ hours / year
